#GoGreenAndSave

"I've always been fascinated by inventions that harness sun, water or wind power to create electricity. Investing in photovoltaic panels was a surefooted investment, as you can calculate the expected electricity savings before purchasing the system. In addition, the panels are guaranteed for 20 years and our climate is very favorable for these systems. I would like to see all Barbadians embrace the Green Energy drive." - Richard Fingall

#GreenEnergy

"After realizing the positive impact both to my bottom line as well as to the environment, I decided to go with an 8KW Solar PV system on my house. This change has allowed me to have more available cash flow and it has given me a sense of satisfaction that I am doing what I can do for the environment by using a clean, renewable energy source to power my home, office and vehicles, no matter how small the impact may be." - Ryan B. Evelyn, C.E.O., MARINE Trading Ltd.

#JuniorMasqueraders

Arthur Smith Primary - "Our Planet, Our Future"

This band raised awareness about the environment and climate change. The students displayed 4 sections – "Storms Ah Coming," "Global Warming," "Plastic Waste" and "Reduce, Reuse, Recycle." The Flag Girl's costume reminded us to "Reduce, Reuse and Recycle," while the Queen of the band depicted "Mother Nature."

#EnjoyRetirement

"Retirement has managed me! It has been an enjoyable and productive period. Since I left full-time employment behind, I've travelled, been active in my church and community, published three books (two in 2022), had articles accepted for publication, and produced a documentary, among other things. I believe that psychological and financial preparation are key elements to being happy and fulfilled in this phase of one's life." - Dr. Sharon Milagro Marshall

#LivingTheGreenDream

"My decision to go 'Green' was first driven by the savings it would afford the company. Electric vehicles could be charged using solar energy, thus reducing the yearly operating costs associated with ICE vehicles. I now have 3 EV's in my fleet which are all charged using the power harnessed from the sun and no other power source, making them 100% green." - Ryan B. Evelyn, C.E.O., MARINE Trading Ltd.
